CEI Evaluation	09/30/2022	Activity Location: NJ	By: STATE	Identifier: 001	Person: SOSG	Suborganization:	Found Violation: NO
NOC Date:		Citizen Complaint: NO	Multimedia Inspection: NO	Sampling: NO	Not Subtitle C: NO	Day Zero: 09/30/2022	Focus Area:
Eval. Notes:	A standard compliance inspection was conducted at Buckeye Raritan Bay Terminal (Buckeye). Buckeye is a 70-acre bulk petroleum storage and distribution facility composed of twenty-seven (27) above ground storage tanks in four (4) tank farms, marine loading dock/rack, truck loading rack and associated transfer lines from storage tanks, offices/garage/boiler building, warehouse/maintenance garage and fire foam house. Buckeye generates Very Small Quantity Generator (VSQG) amounts of non-acute hazardous waste from routine maintenance projects and equipment repairs. The hazardous waste generated waste flammable liquids in the form of waste paint & cleaning solvents (D001 & F003). Buckeye maintains LQG status and follows LQG protocols and documentation as a matter of "Good Business Practice" and because of required scheduled tank clean-outs and refurbishing. The last tank project was conducted in November 2020 and generated LQG amounts of D008 hazardous waste. No other tank projects during the reporting time frame. Buckeye has two (2) satellite accumulation areas (SAA) both outside the operators building. The SAAs consist of one (1) 55-gallon drum of waste solvent contaminated rags (D001 & F003) and one (1) 55-gallon drum of waste aerosol cans (D001) labeled "Hazardous Waste" and the indication of the hazard. The maintenance shop contained one box of universal waste lamps properly labeled. No other waste was on-site. All applicable paperwork was reviewed and found to be in compliance. The Bureau's compliance assistance package was reviewed. Stewardship outreach was also conducted. The last hazardous waste (RCRA) inspection was conducted on 01 June 2012 with no RCRA violations. No RCRA or used oil violations were noted during this inspection.						

No Linked Violations

CEI Evaluation	06/01/2012	Activity Location: NJ	By: STATE	Identifier: 001	Person: COSCC	Suborganization:	Found Violation: NO
NOC Date:		Citizen Complaint: NO	Multimedia Inspection: NO	Sampling: NO	Not Subtitle C: NO	Day Zero: 06/01/2012	Focus Area:
Eval. Notes:	Hess First Reserve Terminal was considered an LQG of hazardous waste due to large shipments of hazardous waste occasionally generated by the facility, though no hazardous waste was found to be on site during the inspection. The inspection was conducted as a routine inspection and to investigate an Unmanifested Waste report submitted by Cycle Chem in Elizabeth (NJD00220046) on 5/5/11 for a nonhazardous waste shipment from the facility that was found to flash below 140 degrees F. No stewardship activities were identified by the facility or noted for the site. Hess First Reserve Terminal is a 70-acre site located on the north bank of the Raritan River within both Perth Amboy and Woodbridge. Facility is a bulk petroleum storage and distribution facility composed of aboveground storage tanks (27 total tanks in 4 tank fields), marine loading dock/rack, truck loading rack and associated transfer lines from storage tanks, offices/garage/boiler building, warehouse/maintenance garage and fire foam house. No oil refining is performed at the site. Facility accepts finished products, including No. 2 oil, jet fuel, kerosene, light cycle oil, diesel, No. 6 oil, cat feed & Algerian residual (mixed w/cat feed to Hess Pt Reading Refinery), for storage and transfer from the facility by barge, pipeline (Colonial) or truck (No. 2 oil, diesel, kerosene only). Hazardous waste is generated from occasional tank cleanouts during routine testing/maintenance (D001/D018 sludges, D008 paint chips), boiler soot ash approximately annually (D006/D007) and other one-time generated wastes, which since the last inspection included outdated/old paint (D001). All vehicle repairs are done off site. Universal waste generated at the site includes batteries, lamps and consumer electronics, which are sent to Veolia facilities for recycling (last shipped March 2012). Nonhazardous water from tank cleaning (when hot work is necessary at a tank) is						

No Linked Violations

Note: Penalty information associated with an enforcement action is reported with the enforcement action. For enforcement actions associated with multiple violations, the penalty information will be reported with each violation, however, the penalty is only assessed once, regardless of the number of violations associated with the enforcement.
